### BASIC ANIMAL INFORMATION

Please list animals from your household that you feel should be re-homed together. Except in rare cases of trios, only pairs are considered for a bonded status.

	Name	Microchip #	Animal Type <i>C, D, R</i>	Age	Sex <i>(M / F / NM / SF)</i>	Relationships*
1						
2						
3						

\*Please indicate the animal's relationships to one another, ex. sibling to [name], parent to [name], or unrelated companion.

You have indicated these animals be re-homed together, as a pair? Please explain why.

For how long have these animals lived together? \_\_\_\_\_

Please describe which of the following describe the relationship between these animals (*check all that apply*):

- Adored each other
- Eat together
- Slept next to each other
- Groomed each other
- Can't live without each other
- One gives the other more confidence
- One teaches the other new things
- One will only meet new people / things if the other lets them know it's okay
- One learns from the other
- Played together
- Will not eat if apart
- Always share toys/food etc. nicely
- Head-butt/rub each other (feline)
- Peacefully co-existed
- Plays chase games
- One always chases the other
- One does not share well
- Avoided each other
- Ignored each other
- Will fight without injuries
- Have fought with injuries
- One limits other's access to resources
- Owner unable to describe detail of pet's relationship to each other
- Other: \_\_\_\_\_

Have these animals interacted with other animals?

Yes  No

If yes, have you seen similar behaviors (as those noted above) occur with other animals, please explain:

Have the animals ever been apart (*e.g. boarding, at vet, etc*)?

Yes  No

If yes, for how long? \_\_\_\_\_

If yes, please describe what you have observed when these animals were apart (*check all that apply*):

- One looks for the other one / searches
- Will not eat unless the other is around
- Seems nervous, unsettled
- Seems depressed
- Paces
- Lack of normal interaction with others
- Acts unusually only briefly
- Acts normally
- No noticeable changes when apart
- Other: \_\_\_\_\_

Is there anything else we should know about the relationship between these animals?
